PROFILE

I'm a passionate front-end developer with a keen eye for design, usability, and performance. I specialize in building intuitive, responsive, and accessible user interfaces that create seamless user experiences across devices and browsers. With a solid foundation in HTML, CSS, and JavaScript, I leverage modern frameworks like React (or Vue/Angular if you prefer) to turn complex problems into elegant, scalable solutions.

PROJECTS

Project: Front-End E-Commerce Website

Description: Developed a fully functional, responsive front-end eCommerce website using HTML, CSS, and JavaScript. The project simulates a complete shopping experience including product listings, a shopping cart, and local storage for cart persistence.

Key Features:

- Product catalog with dynamic rendering from a JavaScript object.
- Responsive layout with clean UI and user-friendly navigation.

Project: Weather App

Description:

Built a responsive weather application using HTML, CSS, and JavaScript that fetches real-time weather data from the OpenWeatherMap API. The app allows users to enter any city name and displays the current temperature, weather conditions, and an icon representing the forecast.

Key Features:

- Fetches live weather data using OpenWeatherMap API
- Displays city name, temperature in Celsius, weather condition, and corresponding icon.
